< 250 mg/L

pH

2.92

HISTORY

Bartholomew Broadbent's love for Portuguese wines stems from their eminent drinkability, restrained alcohol levels and the balance which makes them versatile enough to pair with all kinds of everyday dining. He was looking to make wines which were friendly on the palate, yet with enough quality to please the discriminating connoisseur, at an affordable price. Since then, 20 years and counting, Broadbent has partnered with family owned wineries around the globe to produce wines rich with the essence of place and tradition. First launched in 2005, the Broadbent Vinho Verde quickly earned a reputation as one of the finest Vinho Verdes available. Now, Broadbent is proud to expand the range with canned spritzzy white and spritzzy rosé wines, Instituto da Vinha e do Vinho (IVV) certified, following the same popular bottled taste.

VITICULTURE/VINIFICATION

Produced in the Barcelos commune, from a small region in Northern Portugal. Pneumatic presses are used for gentle pressing to extract free run juice. A slow fermentation takes place under controlled temperatures of 61°F, to protect the character of the Loureiro grape. Broadbent uses a special yeast (QA21) which gives a special character to the wine. This yeast was developed in their vineyards, and is now used all over the world. The way to make a proper Vinho Verde is to suppress the malolactic fermentation and inject carbon dioxide at canning - to give the wine its characteristic spritz.

TASTING NOTES

Fresh with tart green apple, white peach and melon flavors, crisp and zesty finish.

ACCOLADES

GOLD

International Canned Wine Competition, 2022
